

5/10/15

What are five things I learned at the photo shoot?

- ① Hire someone to do the schlepping - consolidate mdsc in one location and have a man with a van or at least a cart on both sides to bring accessories in.
- ② create list with action steps and a list for shopping → give all items a date to accomplish by.
- ③ Buy/collect more than I think I need.
- ④ make sure selection of objects has varying textures/surfaces/shapes.
- ⑤ Space begins with the large pieces and volumes and ends w/ the details. Plants, beads, bowls signs of life are incredibly effective.
- ⑥ Don't skimp → bring in that mg on approval, even if it's a pain, b/c these pictures will stick around
